Education

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech.	Narula Institute of Technology Kolkata	8.57 (Up to 7th sem)	2022-Present
Higher Secondary	Belgharia High School(WBCHSE)	86.4%	2022
Secondary	Belgharia High School(WBBSE)	92.14%	2020

Projects

•**Space of Subhraneel - Portfolio [Live]** : Engineered a high-performance personal portfolio using React and TypeScript, featuring modular component architecture and responsive design to deliver a seamless cross-device user experience. Optimized front-end performance with efficient rendering, smooth animations, and Vercel deployment, achieving fast load times and enhanced UI interactivity.

•**Traveling Website [Live]** : Enhanced a mobile-friendly layout with smooth navigation to ensure a consistent experience across all devices. Implemented Swiper.js for responsive carousels and AOS.js for scroll-based animations, improving user interaction and site appeal.

•**Expense Tracker [Live]** : Developed a scalable, real-time authentication based expense management application using React 18, Firebase Auth, and Cloud Firestore, enabling secure user authentication and live data synchronization; implemented dynamic data visualization with Recharts and optimized component rendering using hooks and modular CSS, resulting in a responsive, high-performance UI deployed on Vercel.

Skills

- **Programming**: Java, C++, C, Python, SQL
- **Web Technologies**: HTML, CSS, JavaScript, ReactJS, Node, Express
- **Operating Systems**: Windows, Linux[Ubuntu, Kali]
- **Database**: MySQL, MongoDB
- **Software**: MySQL Server, VSCode, PyCharm, Jupyter Notebook, iSQL

Certifications

- **ABAP Programming**: Basics of ABAP Programming on SAP BTP Certificate
- **Java**: Object Oriented Programming in Java, Scaler Certificate
- **Artificial Intelligence**: Getting Started with Artificial Intelligence, IBM Certificate

Publication

- **Arduino Based Smart Lighting**, *Apr 2023*
  - The paper explains the design, implementation, and working of an automated lighting system using Arduino and light sensors, including circuit setup, code logic, and energy-saving benefits. Publication Link

- **Enhanced MRI-Based Brain Tumor Classification Using Wiener Filter, U-Net++ and Inception V4**, *Apr 2026*
  - The paper proposes an integrated pipeline combining Wiener filtering, U-Net++ segmentation, and Inception V4 classification to accurately detect and classify brain tumors from noisy MRI images. Publication Link

Core Subjects

•Database Management System

•Data Structures and Algorithms

•Object Oriented Programming using Java [OOP in Java]
